

## IMPORTANT INFORMATION ABOUT ORIENTATION OF THE DICHRIC AND POSITIONING IN ITS BOX

An arrow is engraved on the thinner edge of the dichroic, pointing to the cylindrical face, as shown below.

When packing the window, the line on the box should be on the same side as the arrow engraved on the window.

On dichroic 1, the arrow to be taken into account is engraved and is shown on the following photo:  
(not to be mistaken with the erased arrow on the other side)
